

Scarlett Pay

Release Note – Version V1.8.0

We've made navigation smoother than ever!

Scarlett Pay now temporarily saves a list of recent searches and actions to allow easier repetition of payroll duties.

These **“Breadcrumbs”** are now live on **Commissions/Invoices and Expenses** - no more re-entering the same data to trace receivable allocations. Simply click on the **“Search Results”** in the sub-header to go back to the search you just completed and continue down your result list. Allocation tracking made effortless & simplified!
