

Scarlett Pay

June Release Note

New Feature Alert: Seamless Deal Type Identification with Scarlett Pay

We’re excited to introduce a new enhancement applicable to our clients using both Scarlett Mortgage and Scarlett Pay!

Organizations that utilize tags in Scarlett Mortgage to classify the type or nature of a deal can now benefit by further leveraging this existing Scarlett Mortgage feature.

If enabled, these tags will automatically carry over to Scarlett Pay as an embedded field and will also appear in the Receivable Allocation view.

This enhancement makes it easier to identify special-case scenario deals and supports customized payouts where needed thereby saving time for any manual steps required.
